

Invitation to pathologists and molecular pathologists to attend virtual masterclass

HRD Genomic Instability: Supporting the implementation of best-practice testing processes and techniques across molecular pathology laboratories

CC. Operation managers/Versksamhetschef

AstraZeneca is pleased to invite you to join virtual masterclass on **HRD Genomic Instability: Supporting the implementation of best-practice testing processes and techniques across molecular pathology laboratories** taking place on **Friday 29th Sept. 2023, 14:00-16:00 CEST**. This educational and non-promotional masterclass is organized by AstraZeneca and MSD and intended for pathologists and molecular pathologists only.

Please click [Here](#) and/or scan the QR code to register.

Speakers and presenter:

Dr. Lukas Heukamp

Head of Molecular Pathology
Institute of Haematopathology Hamburg
Hamburg, Germany

Dr. Eva Maria Willing

Head of Bioinformatics
Institute of Haematopathology Hamburg
Hamburg, Germany

Agenda	
14:00	Welcome & Introduction
14:05	Introduction to HRD testing <ul style="list-style-type: none">• Why to test, who to test, and when to test
14:20	HRD testing Considerations <ul style="list-style-type: none">• considerations necessary at each stage to ensure a high-quality testing
14:40	Practical experience and real-world examples <ul style="list-style-type: none">• Speakers' experience of implementation of specific HRD test systems into the laboratory• Expert insights into optimising HRD testing workflows (including troubleshooting advice and lessons learned)• Virtual lab tour
15:40	Q&A

Best regards,
